Blue Cherry ERP

DATA INTEGRATION SPECIALISTS, LLC

Customer Quote:

"Our in house ERP resource abruptly quit his job leaving us with an immediate hole. Data Integration Specialists was referred to us as an excellent source of ERP consultants, including BlueCherry. They responded immediately and today provide a 20+ year BlueCherry (and eVision EDI) experienced resource who provides configuration, BI, Report Development, Support and more. We have the benefit of using them for "on call" cases or as a requirement to be on our system daily for anything BlueCherry related. They even travel! We don't have the risk/costs of an FTE and the DIS team has been great to work with…and their rates are unbeatable!"

-Andy Stoshman, CTO, Apparel Supplier

Data Integration Specialists, LLC, provides Senior Level BlueCherry ERP consultants that have been working with BlueCherry since the late 1980's .

Programmers/PMs, BAs, System Admins, EDI

Our resources have years of experience writing technical specs, creating test scripts, technical analysis, API development, designing, testing implementations of BlueCherry developments, ensuring compliance to existing and development of required data/reporting standards. Our PMs spearhead projects to keep them on time and on budget and our BAs ensure that data points are consistent with internal and external business requirements. Many of us conduct server monitoring, code dump and system log analysis, develop/configure customized BlueCherry solutions, create user friendly interfaces and have 20+ years of eVision EDI expertise.

Functional

Data Integration Specialists has many techno functional BlueCherry consultants who are experienced in all core modules for all CGS products. Often we are asked to determine which central logistics functions should be used together with core modules and then to define those processes.

BlueCherry Configuration

Data Integration Specialists Functional consultants assist in the setup and configuration of any CGS module. Often, there are requirements for simple configuration changes to data points or structures within BlueCherry that are needed to complete an internal or external project.

Process Flow Documentation

Process flow diagrams are created for all critical

business processes. The process flow diagrams have step-by-step instructions that indicate the BlueCherry program user and field-level steps. This is helpful supplemental material to allow users to self-train and create SOP documents.

Data Imports
SQL queries are written to extract data from existing business systems (or Excel) and they are converted to the BlueCherry import formats. The SQL queries can be executed as needed to extract the latest information from the existing systems. This allows for quicker refreshing of the TEST database for CRP's and will shorten the time to load data at go live.

Testing Support
Once the Bluecherry implementation team schedules CRP's, Data Integration Specialists, LLC can assist in the testing of business processes which involves ensuring the system is processing data as required by the customer. It may also involve supplemental training of the staff for concepts that were covered in prior CRP's.

EDI Onboarding / Testing
Data Integration Specialists, LLC has extensive knowledge of EDI (20+ years eVision) and can assist in testing to ensure EDI transactions flowing through the BlueCherry TEST system align with the EDI transactions flowing through the current production system. Data Integration Specialists, LLC also has experience creating/modifying ERP EDI maps.

Report Development
Data Integration Specialists can assist in BlueCherry report creation when Ad Hoc reports, for example, are required. Often times, our clients view the Reporting Tools as being too inflexible so our Reporting experts can provide more human friendly reports within the BlueCherry system or suggest alternative 3rd party solutions. We can build custom reports from the data warehouses and Power BI Reports to compliment the "canned" reports in BlueCherry.

Helpdesk Support
The Data Integration Specialists, LLC team can be leveraged to manage the internal helpdesk for BlueCherry. For any questions or issues that arise, Company XYZ can email and one of the Data Integration Specialists, LLC team members will assist in the resolution of the issue.
