

## **DATA INTEGRATION SPECIALISTS, LLC**

### **OpenText / GXS Upgrade services**

One of the very prominent upgrades companies are doing include migrating from one of the GXS / TLE or Mercator legacy products to another OpenText or enterprise EDI product. DIS' OpenText Services Group provides multiple resources to a project to ensure an on time and on budget project.

DIS responsibilities:

- Total Upgrade Project Management
- EDI analysis / mapping / testing / implementation
- Community management and rapid on-boarding
- Gap analysis, API development and optimization
- TLE upgrade planning / installation / configuration
- B2Bi Implementation services
- Business Process building / Testing
- TLE Mapping/re-mapping and integration on ERP implementations / upgrades, i.e., Visual maps > Application Integrator maps; AI maps to SI; TLE 6.0 conversion to 6.2, etc.
- VAN scripting, connectivity, communications
- AS2 / EDIINT implementation
- TLE managed services
- Pre / post process development
- Divisional consolidation
- System health checks
- Project audits

### **Data Integration Specialists platform of Services**

#### **Communications**

- This service includes an analysis of the data transmission volume and number of trading partners in order to decide which method of communication will be most effective.
- Data Integration Specialists has support for all methods including direct connections, such as AS2 and FTP, or the traditional Value Added Networks (VANS).
- In addition, during this phase, an analysis of the volume and utilization pattern is performed to determine the best method and/or VAN to utilize and the best plan to suit each customer's needs.
- After a particular method has been selected, our staff proceeds with the setup and configuration of the EDI mailboxes and/or direct connections, and the completion of the corresponding communications testing.

#### **Translator Support**

Data Integration Specialists can assist you with all GXS & OpenText applications and can help you with trading partner setups, connectivity to VANS, automated scheduling, error handling, and acknowledgement reconciliation.

Our Remote EDI Administration service provides for complete outsourcing of all your EDI management activities. From monitoring the entire system, debugging maps, fixing errors, building maps and business processes to being the direct contact with all your eBusiness trading partners, our 20+ years of EDI experience will help you maintain the health and growth of your trading partner relationships.

The EDI software applications we support:

- OpenText / GXS, TLE Server, TLE Director, BizMapper, BizConnect, etc.
- Application Integrator
- BizTalk
- WebMethods
- Inovis Trusted Link Enterprise
